

Landscaping and Small Engine Maintenance

Fall 2025 Intakes Available

Program Length: 3 Weeks

Seats: 12 Participants

Program Overview

After completion of this program participants will have gained knowledge and hands on experience of popular landscaping plants and tools as well as hands on experience in identification, landscaping skills, and in the operation and maintenance of common landscaping tools.

Students will also gain knowledge of worker rights, what safety equipment to use, performing site safety assessments.

Each student will be given necessary PPE for course as well as pruning sheers.
